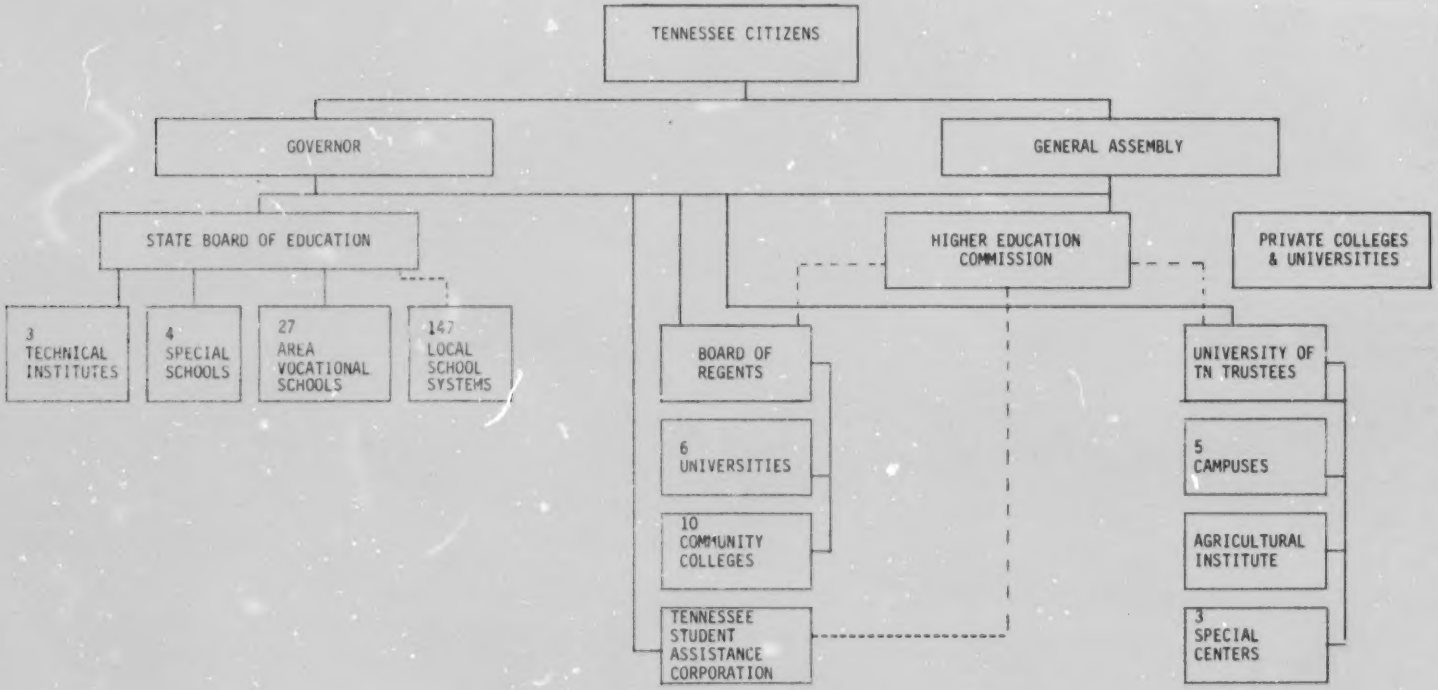
TENNESSEE'S EDUCATION SYSTEM IN 1976



PREFACE

In this volume, the Tennessee Higher Education Commission presents the first annual Statistical Abstract of Higher Education in Tennessee. This abstract covers a wide quantitative breadth of higher education activities in the State, from simple counts of enrollment to more complex analyses of significant trends in higher education in Tennessee. This range of information, collected and published annually, should be useful to planners and decision makers in colleges, universities, state agencies, and to other concerned organizations and individuals. It is our hope that the information will facilitate more effective use of higher education resources.

The data for the abstract were assembled by the Research Division of the Tennessee Higher Education Commission from information supplied by the state-supported colleges and universities, the state's higher education governing boards, and by the Southern Regional Education Board, The Tennessee Council of Private Colleges, and the Tennessee Student Assistance Corporation. This office particularly acknowledges the work of Ms. Brenda Albright and her staff for their meticulous care in assembling and editing the abstract.

Acknowledgement is due to assisting officials within the institutions and agencies, public and private, for their continuing and wholehearted cooperation. To all I express my sincere appreciation.

Wayne Brown
Executive Director

INTRODUCTION

The Statistical Abstract of Higher Education In Tennessee, 1975-76 has been compiled to give a detailed statistical view of higher education in Tennessee. This abstract presents both past and current (1975-76 academic year) information and is designed to provide legislators, educators, and other interested citizens of Tennessee with a statistical account of higher education in the state.

The data reported herein were compiled from a variety of sources. The most used of these sources are:

THE STUDENT INFORMATION SYSTEM (THEC)
THE ACADEMIC INVENTORY SYSTEM (THEC)
THE FACILITIES INVENTORY SYSTEM (THEC)
THE ANNUAL ENROLLMENT SURVEY (TN. COUNCIL OF PRIVATE COLLEGES)
SREB-STATE ANNUAL DATA EXCHANGE (SREB)

The staff of the Tennessee Higher Education Commission has made every effort to verify the validity and reliability of the data reported by the institutions.

In a publication of this type and size, especially with the first issue, some areas are covered inadequately or are omitted. Some such areas in this first abstract are: The UT Center for the Health Sciences, and The Joint University Center.

The uniqueness of The UT Center for the Health Sciences makes data such as part-time/full-time enrollment, FTE enrollment, or first-time freshman enrollment relatively meaningless in comparison with other institutions. Thus, such data are not included herein for UTCHS.

The Joint University Center is a joint operation of Memphis State and the University of Tennessee, Knoxville. Because the enrollment is divided between the two universities, some statistical problems are apparent in a number of tables.

New methods of reporting and more extensive research are being explored for succeeding issues of the Abstract.

WHERE ARE STUDENTS ENROLLING?

Total degree credit enrollment in higher education in Tennessee experienced a 72.0% increase from 1965 to 1975. This compares with an increase of 68.8% nationwide, as reported by the National Center for Education Statistics.[1]

Most of this growth has been in the public sector, with 61.8% of the total enrollment in 1965, 72.5% in 1970, and 77.1% in 1975. Current projections by the Tennessee Higher Education Commission estimate that the public sector will include about 80% of the total enrollment by 1980. This compares with nationwide figures of: 1965: 65.6%, 1970: 73.2%, 1975: 76.3%, and 1980: 78.3%. The widening gap between the enrollment growth in the public and private sectors is illustrated in figure 4.

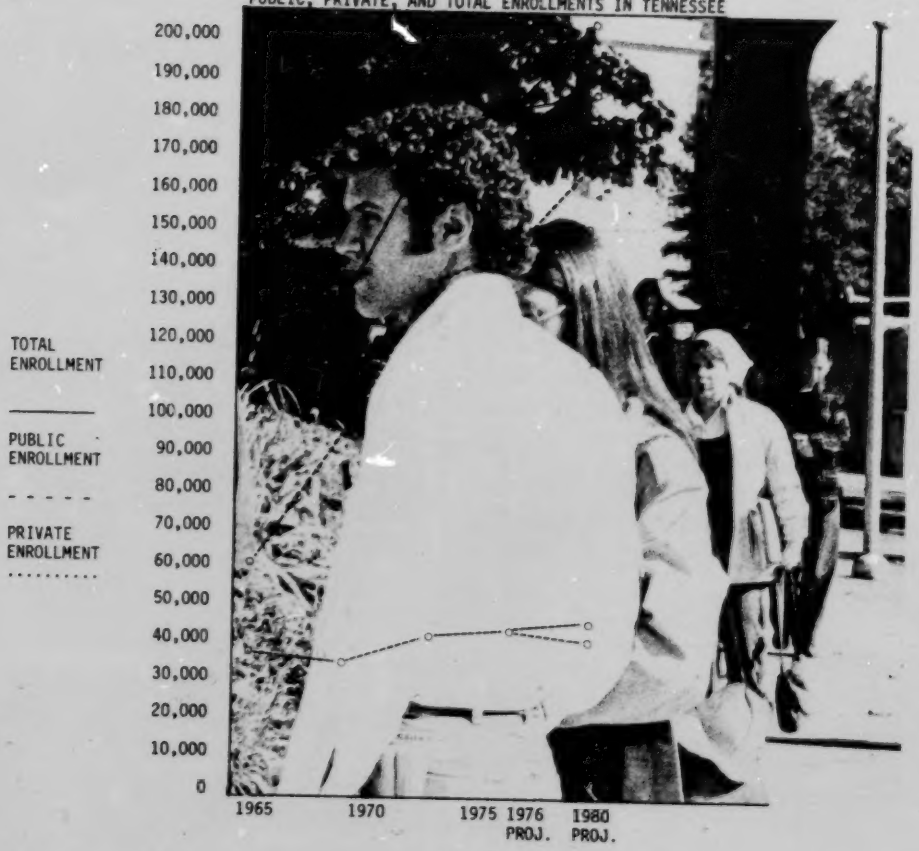
2. IBID

Figure 4

PUBLIC, PRIVATE, AND TOTAL ENROLLMENTS IN TENNESSEE



In the public sector, the fastest growth rate has been at the community college level. Starting at .4% of the total public enrollment in 1966, increasing to 4.9% in 1970, and 14.3% in 1975, the growth rate has been particularly significant since 1973, as illustrated in Figure 5. This growth is projected to continue with community colleges enrolling 19% to 22% of the total enrollment by 1980.

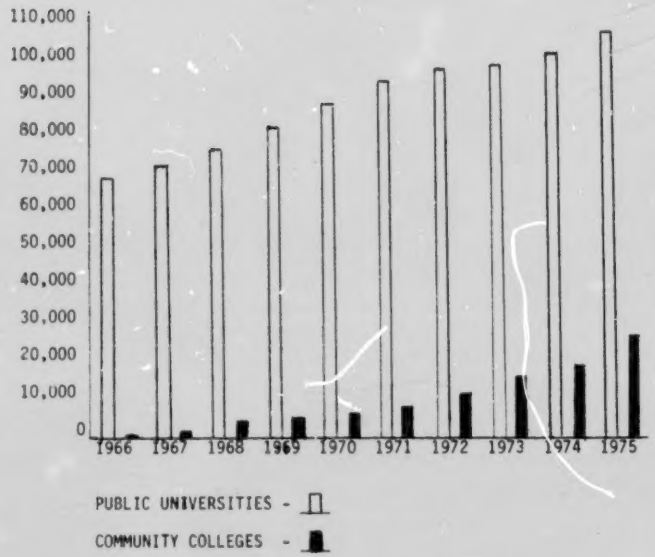
These figures are comparable to the following data on nationwide enrollment at 2-year institutions of higher education: 15.9% of total enrollment in 1965; 20.6% in 1970; 25.0% in 1975; and 27.7% projected in 1980.[3]

It is also important to note that even with the indicated growth at the community college level, public universities have continued to grow at a positive rate.

3. Projections of Education Statistics to 1984-85, NCES 76-210, Table 8, P. 25.

FIGURE 5

PUBLIC UNIVERSITIES AND COMMUNITY COLLEGES ENROLLMENT



In recent years, both the public and private sector have experienced increases in part-time enrollment. The public sector has also experienced a decline in the percentage of out-of-state students enrolled, and a decline in the growth rate of graduate enrollment. These trends are illustrated in Figures 6, 7, and 8. The part-time, out-of-state and graduate trends presumably reflect the economy and job market trends of recent years.
